(770) 776-9967 | elahozmiranda@gmail.com

Summary

FE and Javascript developer with over 12 years of experience building products and leading teams towards building innovative frontend solutions across diverse industries including National Media Broadcasting, Healthcare, HR Digital Transformation, Investment Management, and Financial Services. Currently looking for frontend positions that may require **React** (Vite or Next), **Typescript, React Native**, **GraphQL**, and **Node**.

- Lead FE Engineer for ConnectMe and helped build it from MVP stages through to market launch, sold to eight customers (with 50k to 300k users per customer), and finally sold to ServiceNow.
- Along with one architect, two backend engineers, one designer, and one engineering manager, was the sole frontend developer that built the main CRM web application, fully configurable and customizable, for Cumulus Media (a major radio station company)
- FE Engineering Manager and led a team of frontend engineers to build key features into Blackrock's "Aladdin Wealth" offering that helped secure two major EU clients bringing increased $AUM into the business.
